## *Preface*

*Owing to the project carried out by our Vocational and Technical Education Department in collaboration with the British Council, we have made great progress in English language education which is a crucial instrument in training our students to international standards.*

*Our project has extended over two years to cover those sectors with the highest student recruitment, namely Accounting, Finance and Marketing; Graphic Design, Photography and Printing; Electrical and Electronics; Hairdressing and Beauty; and IT. These are also sectors which require effective communication skills, and we have aimed to train students who can communicate well in English language.*

*We would like to extend our thanks to the following for their contribution to this project:*

*to our project sponsor the British Council for their provision of expertise and finance; to the curriculum development and CLIL expert Mike Scholey for leading the work for Grade 11; to the teachers who have been involved in curriculum development and material writing for Grade 11; to our Deputy Director Gülşen Hoca'nın and our VET expert Şebnem Pekdoğan who managed the project on behalf of our department; to Mint Advertising for their design work; and to our local expert Şerif Tuncel who also wrote the materials for Grade 12.*
